→ Industry Experience

With 40+ years of industry experience, Solutions 4 Manufacturing (S4M), founded in 1999, provides services typically outside of the core competencies of manufacturing companies. We increase your profitability by efficiently boosting productivity and maximizing equipment capabilities.

→ Asset Liquidation

As experts in managing liquidation and surplus equipment sales, we get top dollar for your used equipment and we have the tools to do it. Our extensive worldwide network, especially Latin America, markets to targeted customers. We can handle any size liquidation project, from a single item to an entire plant operation. We have a proven track record for liquidating complete plants.

→ Engineering Consulting

Extensive experience in manufacturing, management, and engineering design

- Packaging & Process
- Start-up Inspections
- Quality Assurance
- Design & Layout
- Maintenance Systems
- V-Chart Capability

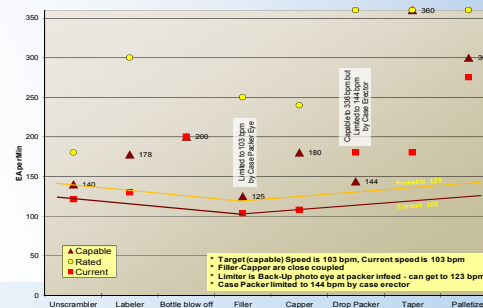

We provide manufacturing solutions for packaging and process production systems

Proven experience in technical and managerial roles internationally for any size project

→ Productivity/Product Capability

Our exclusive Capability V-Chart® will optimize your underperforming lines or processes. Optimal running speeds reduce your downtime. We also offer operating instructions and training.

- Effective performance benchmarking tool
- Optimal line running speed baseline
- Barrier identification—highlight bottlenecks
- Consistent terminology and measurements
- Methodical approach
- Machine capability comparison
- Starting point for efficiency modeling

→ Surplus Asset Management

When equipment is stored at several locations, it is difficult to find or know what you have. Weathering and aging surplus leads to obsolescence and loss of value. It is a time consuming and frustrating task to locate lost surplus equipment.

After we catalog your equipment, your employees can search the personalized and secure online interface to quickly find needed (maybe forgotten) equipment.

Our custom-designed database keeps track of exactly what you have, photos, details, and most importantly, WHERE it is.

Turn your boneyard into a parts warehouse!
